

# LCA Report - Copper LCA Analysis

Generated: 12/9/2025

## Executive Summary

Carbon Emissions: 831.56 kg CO<sub>2</sub>e

Energy Consumed: 16663 MJ

Water Use: 1834.3 L

Circularity Index: 59%

## Process Configuration

Material Type: Copper

Electricity: 1200 kWh

Fuel Type: Diesel

Fuel Energy: 12343 MJ

Transport Distance: 318 km

Transport Mode: Ship

## Recommendations

1. Optimize transport routes or modes
2. Investigate renewable electricity or efficiency
3. Consider switching to renewable energy sources
